

## Special E-Alert! Only for Advanced Footcare Clinic patients!

**Shhhhhh!** Susan, our custom Earthwalk orthotic lab podiatrist and president, goes on her honeymoon June 1st, 2010!

While we wish her all the best, the old saying goes, **'While the mouse is away the cats will play!'** While she's basking in the sun of the Caribbean, we're going to offer our patients something never before done in the history of the clinic!

**Come in and get a second pair of Earthwalk custom orthotics the month of June and receive a 50% discount on your custom orthotic order.\* That's right... custom orthotics for only \$150.00! This is a once in a lifetime opportunity, so take advantage of this amazing special [and make your appointment today!](#) Imagine the convenience of owning a second pair! No more switching that one pair into different shoes!**

Using the latest digital imaging we will scan your foot (unless you have been scanned before) to produce a 3-D image that we use to make your custom orthotics. Beware of the retail giants out there claiming they will give you 'custom fitted' orthotics in 2 weeks. Their scanners do not make 3-D images of the foot, only pressure point color pictures that are used to give you an off-the-shelf prefabricated orthotic. **Our custom orthotics are individually hand-made to your specific foot.**

We believe here at the clinic that everyone can benefit from custom orthotics whether you are having pain or not. Out of sight, out of mind, healthy feet are easily forgotten. But if your feet aren't moving right or you're working them too hard, foot pain may invade your life and your tired, aching feet may be hard to ignore. With years of medical training in foot care, Dr. Vail is an expert in treating foot problems with orthoses. Just as contact lenses improve vision, orthoses improve foot movement.

Remember, **Shhhhhh!** Let Susan enjoy her honeymoon... while we help you enjoy life's activities again pain-free!

Hope to see you in June,  
*The Staff of the Advanced Footcare Clinic*

\* If you have custom orthotics over 1 year old that have not been evaluated by the doctor, you will need to schedule an office visit to evaluate the function and fit of your current orthotics. This office visit will be billed to your insurance. Any co-pays, co-insurance, and deductibles are your responsibility. This orthotic special will not be billed to your insurance. **This special is only available on our current Earthwalk orthotic line.**
